### **DETAILED ACTION**

This Office action is responsive to communication received 07/11/2003 – application papers filed; 10/22/2003 – request for Corrected Filing Receipt; 12/05/2003 – IDS; 03/11/2004 – Response to Request to File Missing Parts; 05/12/2004 – Formal Drawings; 11/22/2004 – IDS; 01/11/2005 – Status Inquiry.

Claims 1-25 are pending.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, drawn to a golf club head, classified in class 473, subclass 342.
- II. Claims 23-25, drawn to a method for the construction of a golf club head, classified in class 29, subclass 428.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another and materially different process such as providing a club head body, forming a recess in the front striking face portion of the body, providing an insert that is sized to fit within the recess, assembling a plurality of bars in successive adjacent contact to one another within the insert, placing and fixing the insert within the recess in the club head so that

Art Unit: 3711

the striking face portion is completed. Alternatively, a single faceplate having a front wall may be inserted within a recess that is formed in the front striking face portion of a club head body. The final club head product, whether formed with a faceplate of one piece or a faceplate formed from a plurality of bars, nonetheless provides a golf club head comprising the essential features of claim 1, namely a striking face with a recess and a faceplate.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application also contains claims directed to the patentably distinct species of the claimed invention, as set forth below. Should the applicant elect the Group I set of claims, above, the applicant is hereby notified that an election of species must also accompany the response to this restriction/election requirement.

Note the following distinct species:

Species I: Figures 1-7;

Species II: Figures 8-12;

Species III: Figures 13, 14;

Species IV: Figures 15, 16;

Species V: Figures 17-22;

Species VI: Figures 23;

Species VII: Figures 24-32.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
